This comfortable modern family home features a second bedroom on the main floor which is perfect for young kids before they are migrated to the basement and can then function as a guest room and/or main floor office space. The covered decks on two sides cover off the options for sun and shade without compromising the flow of natural light. Love the handy BBQ location right off the kitchen. The walkout basement includes good sized bedrooms rec/family room as well as a spacious laundry and storage space. The cold room is also a great feature for the gardener and canners.
